

Castleton Strategies - Comparable Companies Valuation Model

Andrea Michael Dunn | 200 Washington Blvd, Apt 4C, Jersey City, NJ 07310 | (201) 555-0112

Executive Summary

This comparable companies analysis evaluates the current trading valuations and market multiples of leading public corporations in the healthcare, therapeutics, and biotechnology sectors. The purpose of this model is to establish an implied valuation range for early stage diagnostics acquisitions and guide pricing structures for Project MedVance.

All market data is updated as of February 12, 2026. Enterprise values and financial metrics are calculated using the treasury stock method for diluted share counts and are adjusted for outstanding options, convertible debt, and cash balances.

Analysis Scenarios: Baseline valuation represents the average trading multiples of peer firms, while the conservative case discounts high growth outliers to reflect market volatility.

Trading Multiples Comparison Table

Company Name	Ticker	EV (USD Millions)	EV/Revenue LTM	EV/EBITDA LTM
Amgen Inc.	AMGN	148200.00	5.4x	12.8x
Eli Lilly & Co.	LLY	580400.00	15.2x	32.4x
Regeneron Pharm.	REGN	92100.00	6.8x	14.1x
Project MedVance Target	N/A	450.00	4.1x	9.5x

Methodology & Valuation Notes

1. Peer Group Selection: Public peers were selected based on product lines, therapeutic focus, and diagnostic market share. Outliers like Eli Lilly are included for completeness but are excluded from the core average calculation due to high multiples driven by obesity therapeutics.
2. Multiple Selection: EV to Revenue remains the primary valuation multiple used by the transaction team due to the target's high growth and early stage commercialization status.
3. Discount Parameters: The lead modeling analyst, Andrea Michael Dunn, has applied a 10 percent illiquidity discount to the target multiple to account for private market transaction friction.
4. Project MedVance Pricing: Based on the peer median revenue multiple of 6.1x, the implied enterprise valuation of the target lies between \$410M and \$460M. The current transaction proposal of \$450M lies within this range.
